LUGGAGE COMPARTMENT

The luggage compartment lid on your 1953 Cadillac has a counter-balanced construction and is fitted with a key-lock release. To open, insert the key, turn in a clockwise direction and, using the grip under the "V" of the Cadillac emblem, lift the lid up. To close, pull down to a position 6 or 8 inches from closing, remove the key, and push lid firmly downward. This automatically locks the luggage compartment. An automatic interior light operates for your convenience when the luggage compartment lid is raised.

DUAL BACK-UP LIGHTS

Dual back-up lights, which are located directly below the right and left tail lamp lenses, are a part of the tail lamp assembly. These lights operate automatically whenever the transmission selector lever is placed in reverse while the ignition switch is "ON." These lights make backing out of driveways or into parking spaces much easier.
